

Our Preschools

TRINITY COLLEGE

With a passion for educating the whole person, Trinity College offers a world of opportunity for all. The Trinity College Preschools are committed to providing the highest quality Preschool education for children and their families.

Incorporating best practice Early Years pedagogy and based on the Early Years Learning Framework we support and develop the social, emotional, creative, physical, and cognitive potential of each child. Children learn through play in a safe, stimulating, and supportive environment and our curriculum includes themes of kindness, honesty, and joy, helping children learn about Christian values and how to care for themselves and others. This balanced approach helps build a strong foundation for learning and life.

Our Core Values

Relationships First

We are committed to building warm, trusting, and reciprocal connections with children, their families, and the broader community. We honour the diverse backgrounds, experiences, and cultures of our families, and have deep respect for the knowledge and perspectives of First Nations people, who have taught and continue to teach children for over 65,000 years. We actively embed Indigenous perspectives, will amplify First Nations voices in curriculum decisions, and create meaningful opportunities for cultural learning. Our goal is to foster a strong sense of belonging, security, and confidence for every child, ensuring they feel seen, heard, and empowered in their learning journey.

Children as Central

Every action we take centres on the child's needs, interests, and well-being. We listen to children's voices, honour their perspectives, and nurture their agency in a safe and inclusive environment.

Dispositions for Lifelong Learning

We nurture important learning dispositions such as working together, being brave, thinking creatively, staying curious, reflecting on experiences, bouncing back from challenges, and managing emotions. These qualities support children in becoming confident learners and caring members of their community.

We strive to create a holistic learning environment for the child that flows freely from home to Preschool and extends to school life. We collaborate with families as partners in their Children's education—encouraging them to question, comment, guide, and contribute information about their child to support their learning.

Our goal is to prepare each student not only for school but to face the future as an active member in a global community.

At all Trinity College Preschools, children flourish, relationships thrive, and learning is celebrated.

Summary

At each of the Trinity College Preschools, we nurture the abilities and talents of each child through high-quality, play-based education, fostering relationships, developing lifelong learning dispositions, and creating partnerships with families to support children's holistic development and a strong sense of belonging to our community.
